Size Chart

Self Measurements

As sizing varies between different manufacturers here are some hints:

Female

1. Don't pull the tape too tight, allow 3 fingers to fit snugly between the tape and body.
2. Bust: Measure under the arms and across the fullest part of the bust whilst keeping the tape level across the shoulder blades.
3. Waist: Measure at natural waistline, just above the hips.
4. Hips: The fullest part of the hips should be measured. Ensure enough room to allow tape measure to slide up and down.

Male

1. Don't pull the tape measure too tight
2. Neck: Measure around the lower neck allowing two fingers to fit: snugly.
3. Waist: Measure around the natural waistline, keeping the tape level and straight.
4. Chest: Measure around the chest at a high underarm level, keeping the tape level.

How to Care for your Garments

Your uniform items have been designed to last. Quality fabrics and manufacturing techniques, combined with a little time and care will extend their life and keep them looking fresh.

- Specific care instructions are sewn into all garments, please follow these instructions.
- Do not use bleach or washing powders containing bleaching agents.
- Always separate whites from coloured garments before washing.
- Remove any stains using a good stain remover rather than soaking the garment.
- Do not tumble dry as it will shorten the life of your garment and it may cause shrinkage and discolouration.
- Do not dry garments in direct sunlight. For best results dry garments on hangers or flat dry in the shade. This will extend the garment life and avoid fading.
- To retain the shape of your garments, hang them on plastic coat hangers when not being worn.
